## Relay Conference Captioning<sup>SM</sup> (RCC)

- ▶ A Sprint service that allows deaf and hard-of-hearing individuals to *participate equally* in multi-party conference calling
- ▶ A remote captioner listens to the call, captions the dialogue, and speaks on behalf of the deaf/hard-of-hearing participant
- ▶ RCC makes conference calls *faster and more efficient* than traditional relay calls
- ▶ Deaf/hard-of-hearing participants read on-screen *live, realtime* text streamed to an Internet-connected computer anywhere in the world
- ▶ RCC is provided *free of charge* by Relay North Carolina
- ▶ RCC uses the same high-quality captioners that produce closed captioning for television
- ▶ Captioners can handle dialogue up to 225 words per minute and maintain an accuracy rate of 98% or better
- ▶ A high-speed Internet connection is not required
- ▶ Reserve live captioners in advance—*no waiting*
- ▶ Request text transcripts of all conversations for your records

Relay North Carolina is provided by Sprint.
